

Cellabag™

Storage, cellaring & maturation of wine

© November 2006

Cellabag™

Description

Cellabag™ flexibility makes an all-in-one system for storing, cellaring and maturing wine. Cellabag™ is made from advanced high barrier metallised food grade plastic preventing excess ingress of oxygen.

Applications

- Wine Storage facility
- Can act as a wine barrel
- Ideal for transporting wine
- Cold store juice storage

Benefits

- Inexpensive intermediate bulk storage
- Small batch storage / blending
- Ullage losses reduced compared to barrels
- Manageable size for total flexibility

1000 litre Cellabag™ in a collapsible Pallecon container

Construction

Cella-bag™ is suitable for Red and white wine storage and maturation.

Typical bag construction:

Two outer layers of Metallised polyester

Two inner layers of Hi Flex PE

Fill Assembly - 2" BSP Dur-O-gland

Discharge Assembly - 2" BSP discharge gland, perforator & cap.

Product code & size

Code	Litre	Ports
