

Cella-Stac[®]

The flexible System to Store & Cellar Bottled Wine

© November 2006

Cella-Stac[®]

Description

Cella-Stac[®] is a modular palletised system to store and cellar bottled wine. The system comprises durable plastic trays with individual bottle cavities. The modular system allows you to maximise your warehouse space creating stacks up to 192dozen bottles per pallet space or "footprint". It is safe, stable and efficient.

Applications

- Safe and economical replacement of wooden and plastic bins.
- Improved workplace safety environment.
- Suitable for still wine and Tirage stage of sparkling production.
- More environmentally friendly than cardboard cartons

Benefits

- Improvement of Occupational HS&E
Pack at optimum work heights; no bending,
Broken glass is reduced & isolated
- Reduce costs – Cella-Stac[®] is faster to pack and unpack than bins or cartons
- Eliminate BVS closure damage – bottle on bottle contact is totally eliminated.
- Cella-Stac[®] is cleaner – eliminate dust
- Inventory is exact, counting is accurate and, fast.

Construction

Cella-Stac[®] is made from durable high quality food grade plastics. It has a life expectancy of up to 15 years. Cella-Stac[®] will not become brittle or and is designed to stand up to the "real world" rigours of the winery or commercial bottling line.
