G-Bung™

Description

The G-Bung™ range of silicone bungs are designed for sealing wine barrel openings. They are available in three styles, recessed solid and fermentation.

Benefits

- G-Bungs™ cleaver design allows for variation in barrel hole size
- Available in a range of colours for coding or for quick barrel identification
- Easy grip flared top for removal
- Flared top prevents over driving of bung
- Fermentation bung allows gas to escape
- Easy to clean

Construction

Designed and made in Australia, G-Bung is made from food grade, colourfast silicon.

The recessed and fermentation bungs are rounded inside to assist with easy cleaning
