

ROTOJOLLY & JOLLY-CO

Automatic Riddling machines & cages for sparkling wine production.

© March 2007

RotoJolly

Description

Automatic rotation machines for the riddling stage of sparkling wine production.

Construction

Extra heavy duty steel frame and galvanising to guard against corrosion. RotoJolly units are free standing for sit flexibility. Designed to be expandable.

Double cage RotoJolly and program controller

Benefits

- The only horizontal double cage machine that can be safely and easily double stacked to create a 4 cage unit without significant engineering modifications.
- Standard software control package comprising 3 pre programmed cycles and facility for 3 additional custom programs.
- Base controller can run up to 48 rotators (ie 12 x 4 cage quadra machines)
- Simple to load and unload with forklift
- Purpose built machine and cage unit means perfect compatibility.
- Cages can be folded down when not in use for storage or transport.

Quadra Unit. – can be made from 2 x Doubles

Jolly-Co LF504 cage assembled and folded for transport

Cage Dimensions

Cage External Dimensions	1100 x 1325 x 1100mm
